

On May 19th, 2016 the Town of Parachute Board of Trustee's approved Ordinance 695. The Ordinance outlines the billing fees for water, wastewater, irrigation and bulk water usage for the Town of Parachute and will become effective on July 1, 2016. Below is a chart detailing the utility rates associated. Should you have any questions, please contact the Town of Parachute at (970)285-7630.

**BULK WATER SERVICES**

DESCRIPTION	RATE
Flat Rate Per 1,000 Gallons	8.00

**WASTEWATER SERVICES**

The monthly sewer charge shall be based upon the greater of either the prescribed monthly gallons for that use per month set forth in the table below, or the monthly average of water use as established by averaging actual water use within several prior winter months (ranging from two (2) months to five (5) months within November to March, inclusive, depending upon the billing cycle within which the account is placed); provided, however, that if actual monthly consumption exceeds the prescribed minimum monthly gallons for that use but is less than the monthly average that would otherwise apply, the charge shall be based upon actual monthly consumption. If the consumer did not receive water during the prior winter months which would otherwise be used to establish a monthly average, the Town Manager shall estimate the number of gallons used, based upon similar uses, and base the sewer service charge upon this estimate. If the consumer can furnish factual information to the satisfaction of the Town Manager that: (1) at least twenty-five percent (25%) of the water used during the prior months used to establish the monthly average is not returned to the public sewer system; (2) such winter water use is not typical of annual sewer use; or (3) the Town Manager's determination is otherwise incorrect, a proportionate adjustment may be made in the discretion of the Town
